JUNIOR SOFTWARE ENGINEER

PROSYNC

Dear Ma'am/Sir,

This letter is to express my interest in the Job Position posted on Facebook. I found your posting through an Internet search. I feel that I am an ideal candidate for the position, and I also believe that my education and work experience have prepared me for this career opportunity.

I graduated from Jose Rizal University with a bachelor's degree in Information Technology. My degree was focused on developing software solutions and website applications for businesses and organizations. I have been programming with PHP for so many years. During college, I had multiple opportunities to use my skills since I began creating a Job Portal website, a website that advertises a job and suggests proficient candidates that are suited for the company.

In addition to my academic experience, I also have work experience relevant to this career opportunity. The internship at Marketlink Web Solutions has given me the opportunity to gain experience in using PHP, HTML5, CSS3, MySQL, WordPress, and JavaScript programming languages. Using those tools and Programming languages, I developed a variety of web pages and websites for clients, including a website for one of the company's biggest clients Ms. Myrtle Sarrosa. I am also responsible for creating a website for the company's Australian client and I also became a team leader of a team to develop the acqen.com website that offers a web development service used for the company.

Thank you. I hope my qualification and experience merit your consideration and look forward to working with you and joining the team at the company

Best Regards,

Jesther Costinar
